

DATASTATIONS FROM BOWE IQ

- > COLLECTS DATA IN A SPLIT-SECOND
- > ENABLES ULTRA-FAST PROCESSING
- > NO NEED FOR MANUAL DATA ENTRY
 - > EASY INTEGRATION WITH WMS
 - > MULTIFUNCTIONAL
- > SIGNIFICANTLY REDUCED ERROR RATE
 - > SPACE-SAVING

Streamline your workflow with the new DataStation from BOWE IQ! This versatile solution allows you to scan, weigh, measure, photograph, print labels, and log items – all in a single step.

The fully customisable DataStation can be configured with any combination of these functions, making it an invaluable asset for a wide range of high-volume industries. When used as a parcel registration table, it lays the foundation for fast, accurate and traceable deliveries. It also greatly enhances efficiency and accuracy at parcel sorting stations, packing stations, and inbound receipting or outbound shipping areas.

Integrating your DataStation with BOWE IQ software will make the collected data work even harder by using it in real-time to automate workflows across numerous applications – from managing conveyors and sorters to orchestrating Pick/Put-to-Light solutions and dock door flow.

SPECIFICATIONS

DT-2320

Dimensions:

800 mm (W) x 890 mm (D) x 2320 mm (H)
31.5 in (W) x 35.0 in (D) x 91.3 in (H)

Weight: ~45kg depending on overall configuration

Measuring device type:

Static weight and volume measurement

Connectivity:

Ethernet (Gigabit), serial connection: 2x RS232 (for scales), 2x USB 3.1 Gen 1; 2x USB 2.0, WLAN: optional (via USB hardlock), LTE: optional

Operating conditions:

Temperature: 0°C - 40°C / 32°F - 104°F
Relative air humidity: 0 - 85%
Indoors with no direct sunlight

Ingress Protection rating: IP50

Power supply: 100 - 240 V AC; 50 - 60 Hz

Configuration options:

Scanner
Touch Screen and Keyboard
Label Printer
Table scale (500 mm x 400 mm, 30kg max. weight, 5g resolution)

THE PERFECT PARTNER FOR OUR DATASTATION

While the BOWE IQ DataStation can be purchased as a standalone product, it also works in perfect harmony with our Pick/Put-to-Light (PTL) trolleys, complete with shelves, lights and electronic displays. With intelligent BOWE IQ software orchestrating the workflow between the two, items can be weighed, scanned, and labelled at the DataStation and simultaneously logged onto the PTL system that controls the lights and displays on the trolleys, guiding workers visually to the correct tote-box.
